

Please answer questions 1 through 4 on the graph paper provided.

- 1) We will need an overall dimension of your pre-existing room that you are putting cabinetry into, along with a rough layout of what you have now. (Please feel free to download our "Graph Sheet" to draw all of this information onto.)
- 2) We will need an exact centerline of the window from either a left or right wall.
(Find the overall center of the window, and then with a tape measure, measure from the wall to this center point.)
- 3) We will need to know your floor to ceiling dimensions.
- 4) We need to know if you are keeping the same appliances, and if not, what the exact new sizes are going to be.
(Without this information, it is more difficult to get an accurate quote.)
- 5) We will need to know what type of floor you have currently, and if you are keeping the same floor.
